

**NEW Stainless Steel-Locking Pins with Key**

**GN 314**

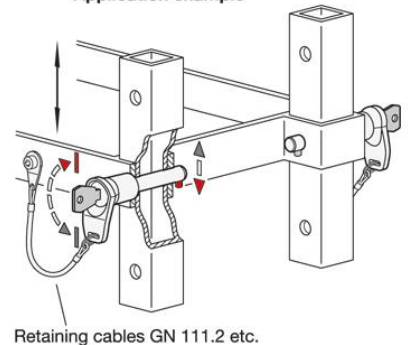

Stainless Steel-Locking pins with key

GN 314 are used for quick fixing, connecting and locking of various jigs.

The locking pins are characterized by their axial securing of the pin. This is achieved by turning the key. After locking, an accidental or unauthorized removal of the pin is no longer possible.

Application example

**NEW Right-Angle Spirit Levels GN 2276**

Right-angle spirit levels GN 2276 are used to check the horizontal position of devices, machines and instruments.

The levels are available in two different sensitivities and, depending on the type, with or without adjustment function.

The anodized aluminium housing is being offered in natural colour or in black.

2/20 Sedgwick street, Smeaton Grange, NSW 2567
