

Stainless Steel Linear Guide Rail Systems

The new linear guide rail systems consist of cam roller linear guide rails GN 2492 with cam roller carriages GN 2494 moving inside these rail systems.

Cam rollers GN 2496 and wipers GN 2498 can also be supplied separately from the cam roller carriages.

Because of the stainless steel material, the rail systems can also be used in particularly aggressive environments that can be found, for example, in the chemical, pharmaceutical, medical or food processing industries.

CFGY Lift-off Hinges for Profiles

CFGY lift-off hinges, made of glass-fibre reinforced polyamide SUPER-technopolymer, are black or grey RAL 7040 coloured, with a matte finish.

The rotating pin is made of self-lubricating glass-fibre reinforced polyamide based technopolymer, black coloured.

Available with pass-through holes for M6 countersunk head screws, with rotation pin fitted on the left or on the right hinge body, CFGY hinges can be used with profiles of 40 mm, with slot dimensions from 8 to 10 mm.
